

World Bank Group Investment Contract Analysis

About the World Bank Group

The World Bank Group is a global partnership of financial institutions that aim to promote long-term economic development and reduce poverty in developing countries

“The World Bank Group supports countries through policy advice, research and analysis, and technical assistance”

The World Bank Group finances contract awards under Investment Project Financing (IPF) operations. IPF not only supplies borrowing countries with needed financing but also serves as a vehicle for sustained, global knowledge transfer and technical assistance.

About our Data

The data includes all contract awards financed by The World Bank under IPF operations. The primary focus of our investigation considers the effectiveness of the contracts financed under IPF operations. Many of these contracts are focused in social and economic infrastructure.

Why does the data matter?

The primary goal of our data analysis is to conduct an investigation into the effectiveness of investment contracts financed by the World Bank Group in their attempts to bring financial stability and reduce poverty in developing countries. By comparing the primary dataset with other actionable metrics, we hope to better understand the extent of the effects of these investment contracts in bettering the economic futures of developing countries.

Our Questions

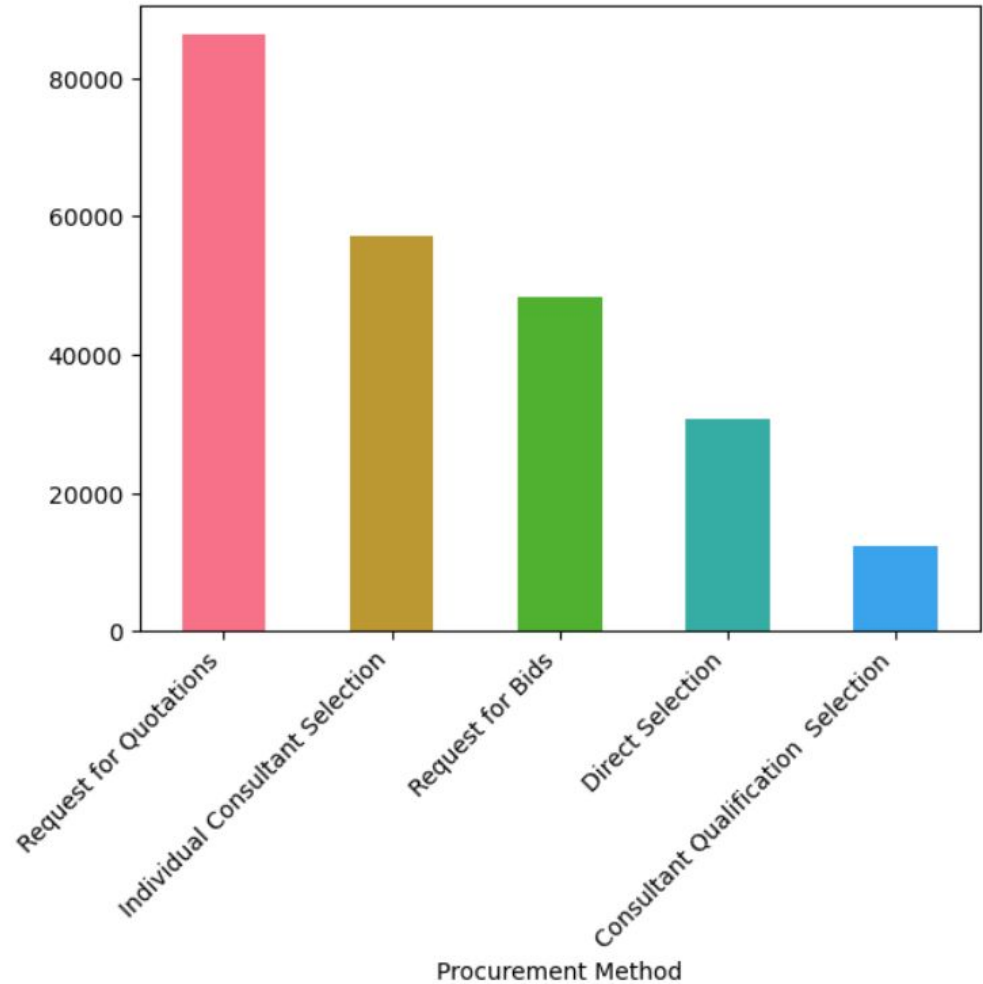

1. Examine high level trends across global practice and procurement
2. Find leading supplier contract countries across each region
3. Examine the top suppliers for the top supplying country
4. Examine top contract amount awarded
5. Identify investment trends across industry and procurement category
6. Explore future forecasts of investment contracts

Question: TBD

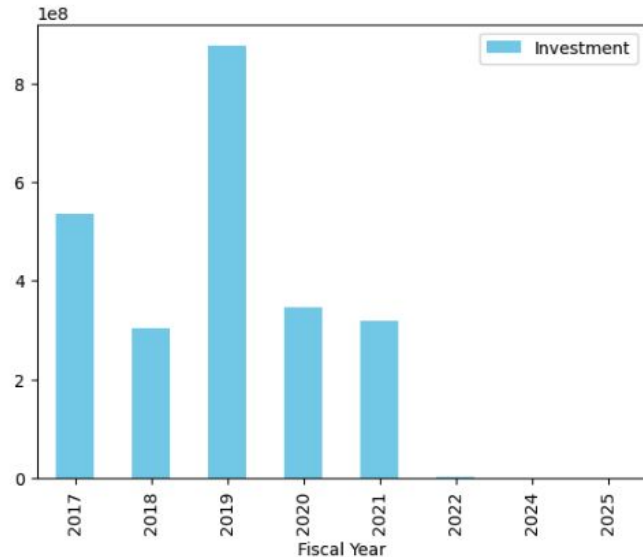

Afghanistan Analysis

Explore future forecasts of investment contracts

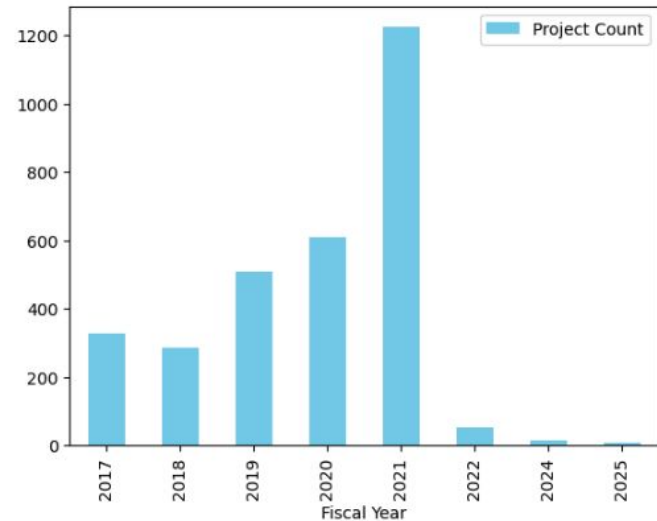

Trend of investment & no. of projects

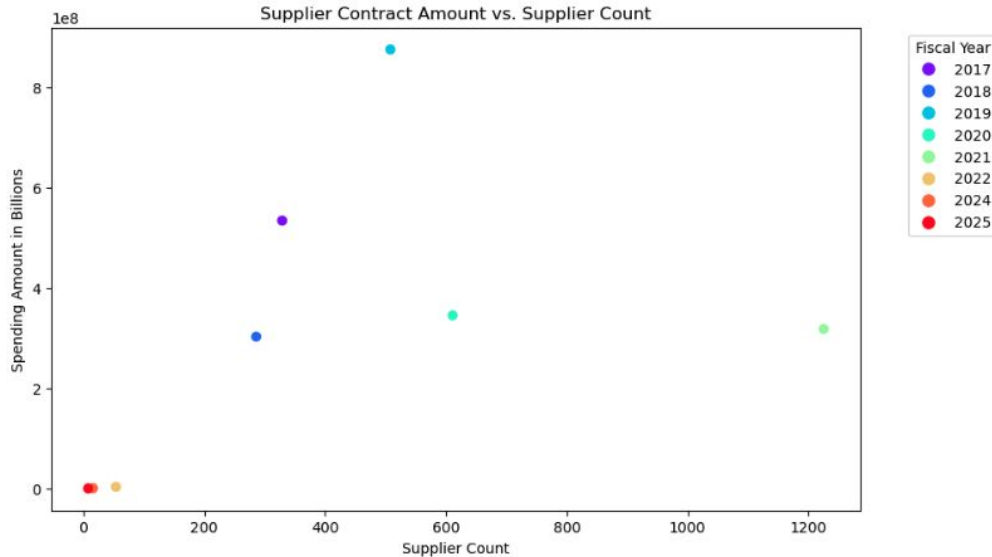

Bar chart showing amount of money country invested year over year

Bar chart showing project count country had working for them year over year

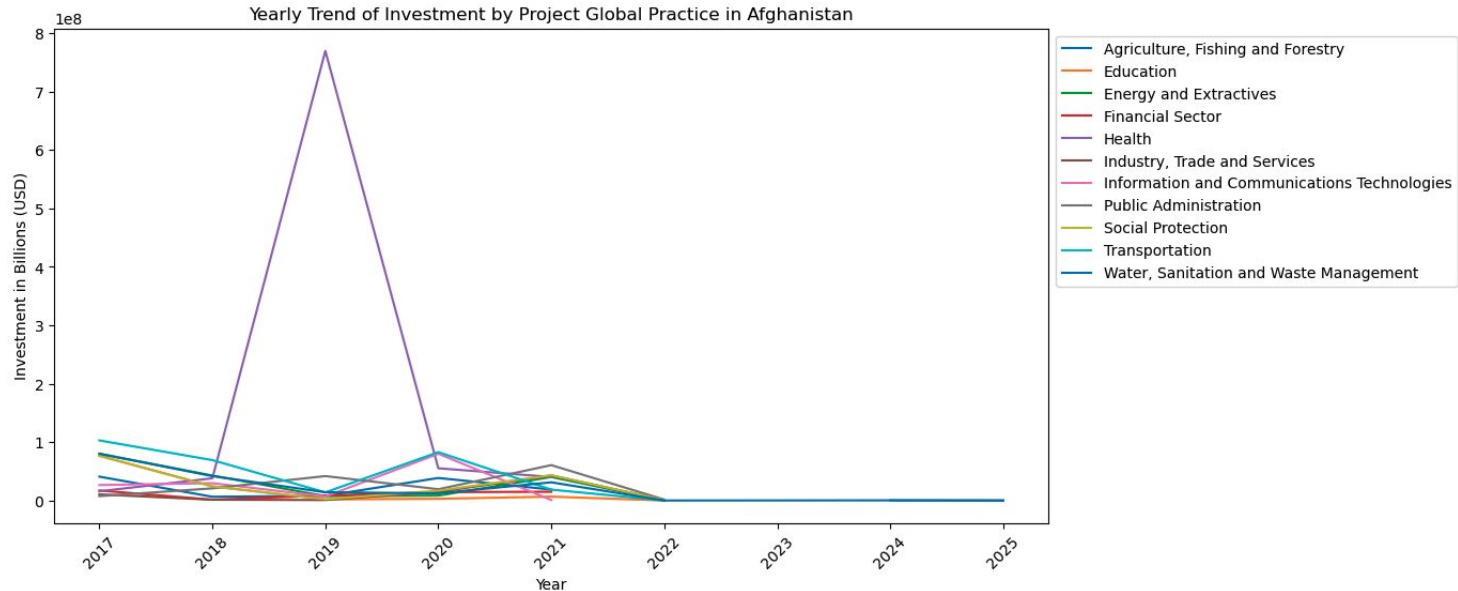

Relationship between investment Vs project count

Scatter plot to identify if there is a relationship between amount of money Afghanistan invested vs no. of times suppliers it had every year.

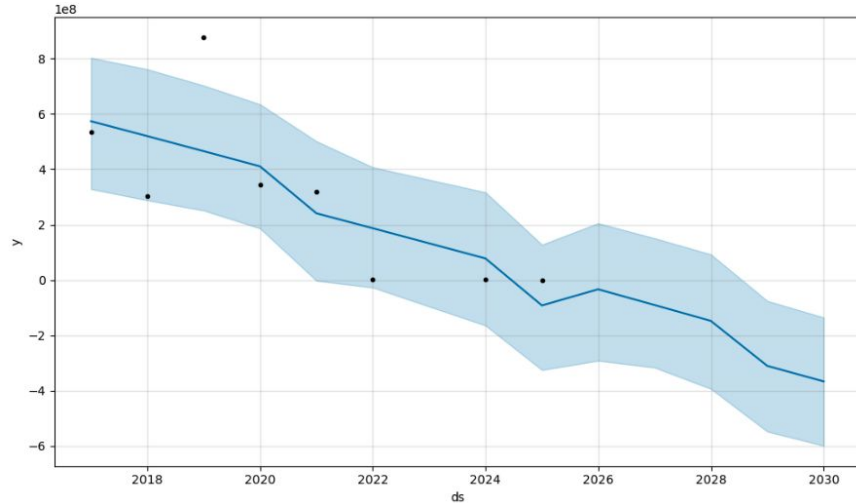

Yearly Trend of Investment by Practice

Year over year trend analysis by practice area to identify heavily invested area in Afghanistan

Forecast of Investment/Projects for next 5 yrs

Forecast of investment to be made in future

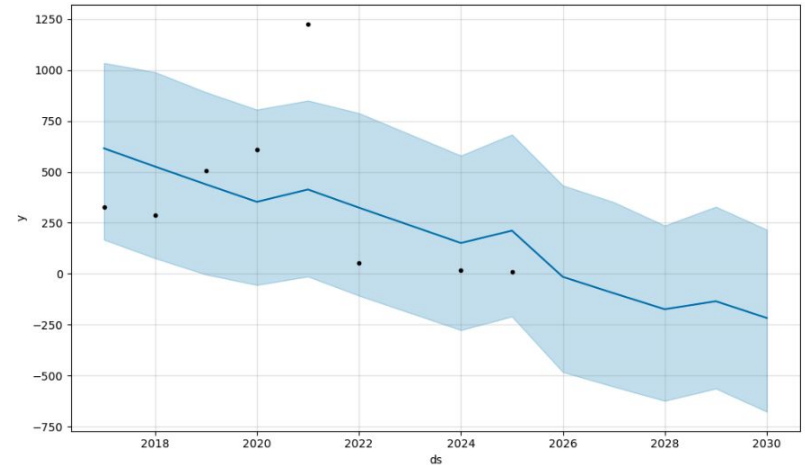

Prediction: Negative

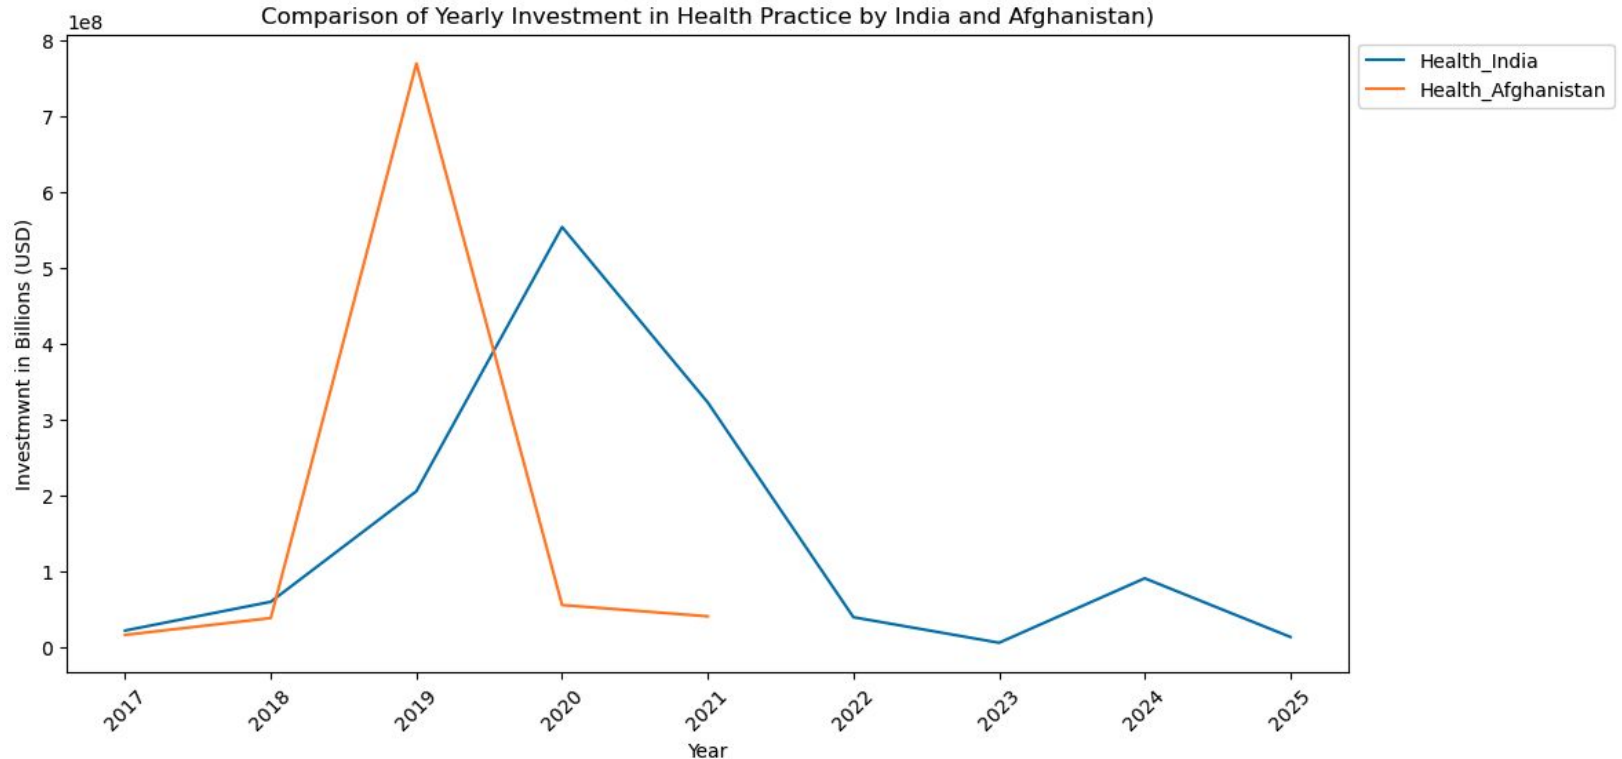

Reason: US withdrawal in 2021

Question: Is country doing great without any support?

Forecast of Projects to have in future

Comparison between India Vs Af in Heath Practice

Major Findings

- Project Global Practice focused more on Agriculture, Fishing, and Forestry(20%)
- Most projects were for consultant services (38.9%)
- Most countries were their own major suppliers
- China had the highest total supplier contracts
- India was the highest borrowing country
- Afghanistan and India both made hefty investment in Health practice however in India Trend increased significantly in 2020 possibly due to Covid.

Future Questions/Next Steps

1. How can we better measure the impact of investment contracts in developing countries?
2. Can we evaluate how worthwhile these contracts are given more time?
3. Across different project categories, are there other metrics that can be analyzed to find correlative patterns between investment and financial stability in these sectors?
